Summary

Frontend Developer with hands-on experience building responsive, scalable web applications using React.js, JavaScript, and Node.js. Skilled in REST API integration, state management, and reusable component design. Experienced in AI/LLM-powered application development using LangChain and RAG. Seeking a Frontend/Full Stack Developer role to contribute to production-grade web applications.

Technical Skills

Languages: JavaScript, TypeScript ,Python, Java.
Frontend: React.js, Redux, Redux Toolkit, Tailwind CSS, HTML5, CSS3, Responsive Design, React Hooks, Context API
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Middleware
Databases: MongoDB, MySQL
AI / LLM: LangChain, Retrieval-Augmented Generation (RAG), LangGraph, LLM APIs, Gemini API
Developer Tools: Swagger, Git, GitHub, VS Code, Postman, Google Colab
Concepts: Operating Systems, Computer Networks, Object-Oriented Programming, DBMS

Professional Experience

Frontend Developer Trainee, Nitroxen Tech Pvt. Ltd. **April 2026 – September 2026**
Pune, Maharashtra

- Developed and maintained responsive, scalable web interfaces using React.js, JavaScript, and Tailwind CSS.
- Worked on multiple agriculture and farm-management modules, including Farm Management, Inventory Management, Irrigation, Crop Library, and User Management.
- Integrated frontend applications with RESTful APIs, handling data fetching, form submissions, loading states, error handling, and dynamic UI updates.
- Built reusable and modular UI components to improve code maintainability, reusability, scalability, and consistency across the application.
- Implemented complex forms with client-side validation and dynamic data handling to ensure accurate user input and reliable workflows.
- Developed responsive, user-friendly interfaces optimized for different screen sizes, devices, and browser environments.
- Collaborated with backend and development teams to define API contracts, resolve frontend-backend integration issues, and deliver production-ready features.
- Contributed to application usability and performance improvements through UI enhancements, bug fixes, and code optimization.

Projects

MGS AI – AI-Powered Chat Application
Technologies: React.js, Redux Toolkit, Tailwind CSS, Node.js, Express.js, Gemini API

- Engineered a full-stack AI chat application enabling real-time conversational interaction using the Gemini API, handling dynamic queries with low-latency response flow.
- Architected a scalable 4-layer frontend structure (UI, Hooks, State, Service) with Redux Toolkit, optimizing state management for chat history, async API calls, and error handling.
- Built a responsive dark-themed UI using React.js and Tailwind CSS, incorporating typing indicators, markdown rendering, and smooth auto-scroll to improve interaction clarity.
- Built backend services with Node.js and Express.js, implementing input validation, API timeout handling and secure API key management using environment variables.
- Optimized performance and reliability by preventing duplicate API calls, handling edge cases, and ensuring stable rendering for long conversations.

TeamSync - Workforce Management Platform
Technologies: React.js, Redux Toolkit, Tailwind CSS, Axios, Vite, REST APIs

- Developed a responsive workforce management platform with employee lifecycle management, REST API integration, asynchronous data operations, search, and form validation.
- Implemented Redux Toolkit for centralized state management, asynchronous API workflows, loading states, and error handling.

- Built reusable React components for forms, modals, tables, inputs, and dropdowns using a modular component architecture.
- Implemented debounced employee search by ID and name with API-driven results, validation, and empty/error states.
- Integrated dependent Country–State–District selection with international phone number validation for employee data.
- Designed a dedicated Axios service layer to separate API communication from UI and state-management logic.

Education

Shri Vile Parle Kelavani Mandal's Institute of Technology, Dhule **2021 – 2025**
Bachelor of Technology in Information Technology Engineering; CGPA: 7.55/10

R.O. Nikam Junior College, Gondur, Dhule **2019 – 2021**
Higher Secondary School (HSC); 80.60%

Late Chi. Abhijeet Thakare Madhyamik Vidyalaya, Morane (P.L.), Dhule **2018 – 2019**
Secondary School (SSC); 77.80%
